Please Rate the Following Statements:

	Strongly Agree	Agree	Disagree	Strongly Disagree
CONTENT				
• Was organized and easy to follow				
• Met the objective(s)				
TRAINER				
• Knows and understands the topic				
• Was well organized and prepared				
• Was clear and easy to follow				
RELEVANCE – as a result of this training...				
• I gained factual information				
• I gained a better understanding of the topic				
• I have developed more skills and competencies				

	Strongly Agree	Agree	Disagree	Strongly Disagree
1. This was a quality CME activity and met the following objectives:				
• Recognize infants and small children as being at highest risk for abuse.				
• Distinguish between worrisome injuries and normal injury patterns in infants and small children.				
• Understand the concept of a sentinel injury.				
• Master a helpful decision rule to know which injuries may suggest abuse.				
2. This CME activity will favorably influence my ability to practice medicine as a leader, teacher or researcher.				
3. The program clearly indicated whether or not this CME activity received commercial support.				
4. I observed no overall commercial bias in this educational session.				
5. I would definitely recommend this CME activity to my colleagues.				

Please estimate the number of infant and children that you see in a month with suspected child abuse and/or neglect:

What did you like best about this session?

What did you like least about this session?
