

# Did your child just test positive for COVID? We need their help.

Your child can join a study to help us learn about the long-term health effects of COVID, called Long COVID.

We'll compare children who had COVID to those who never did – this helps us learn what's related to having Long COVID.

## Who can join?

Your child can join if they **just tested positive for COVID** (which means they have COVID now). We need babies and children from all ages, races, ethnicities, and backgrounds to join.

You can also join as their parent or caregiver!

## What will happen if my child joins?

They'll get paid for their time and we may ask you and your child to:

- Answer survey questions
- Have checkups and tests

**This study will not give anyone a treatment or medicine for COVID.** If your child joins this study, your child can still take treatments and medicines their doctor gives them.

 **Your child's privacy is important to us.** We will follow all laws to protect your child's personal information.
